

The Company

Minitab helps companies and institutions to spot trends, solve problems and discover valuable insights in data by delivering a comprehensive and best-in-class suite of data analysis and process improvement tools. Combined with unparalleled ease-of-use, Minitab makes it simpler than ever to get deep insights from data. Plus, a team of highly trained data analytic experts ensure that users get the most out of their analyses, enabling them to make better, faster and more accurate decisions.

For nearly 50 years, Minitab has helped organizations drive cost containment, enhance quality, boost customer satisfaction and increase effectiveness. Thousands of businesses and institutions worldwide use Minitab Statistical Software, Companion by Minitab, and Quality Trainer to uncover flaws in their processes and improve them. In 2017, Minitab acquired Salford Systems, a leading provider of advanced analytics which delivers a suite of powerful machine learning, predictive analytics and modeling capabilities.

Quality Trainer[®]

Learn to see your data with a comprehensive statistics course for the most commonly used tools.

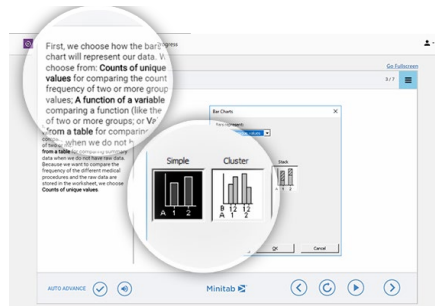

Quality Trainer teaches you how to analyze your data anytime you are online. This e-learning course includes animated lessons, quizzes, and hands-on exercises to help you easily learn statistics and how to use Minitab.

Quality Trainer contains nine chapters with more than 100 interactive lessons that you can use and repeat at your own pace. The course covers the most commonly used graphs and statistical tools, including Hypothesis Tests, Control Charts, Process Capability, ANOVA, Regression, and more.

Quality Trainer is also available in Spanish, Portuguese and Simplified Chinese (please note the voice-over remains in English).

Harness the full power of Minitab Statistical Software

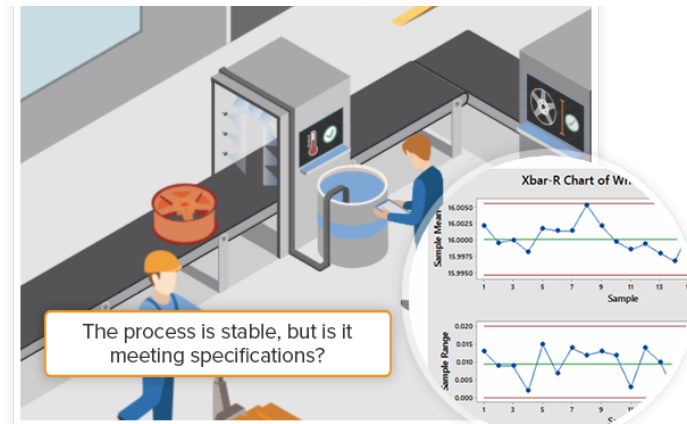

Once you learn a statistical concept, Quality Trainer teaches you how to use Minitab to run the related analysis. Step by step videos show you exactly what to do, and data sets are provided to give you the opportunity to practice for yourself.

Statistics brought to life.

Quality Trainer's engaging animations and real-world scenarios transform abstract statistical concepts into an applicable toolkit. Narrators thoroughly explain each concept and how you can utilize it to analyze data and discover solutions to your business problems.

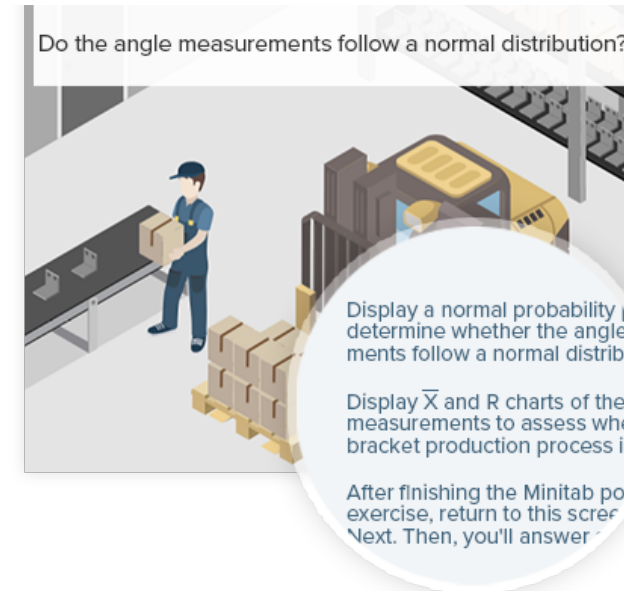

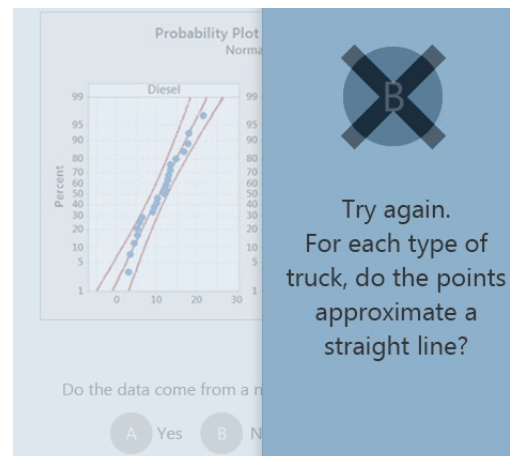

Lessons are easy to follow and give you a deep understanding of statistics. And if you forget how to use a tool or interpret your results, you can refresh your knowledge by replaying lessons anytime.

Put your knowledge to the test.

Interactive quizzes not only test your knowledge, but also explain why your answers are correct or incorrect. They even recommend which lessons to review to fully master the material.

This real-time feedback reinforces your learning throughout the course, and the option to retake a quiz whenever you want helps you refresh your understanding anytime.

Progress at your own pace.

Quality Trainer outlines the course in a dynamic table of contents that makes each chapter, lesson, and activity available with a single click. You can work through the material from start to finish, or skip to a specific topic to learn or review.

The table of contents even tracks your progress and remembers your last activity, so you always know where you are in the course and can pick up exactly where you left off whenever you want.

Move seamlessly from theory to practice.

Quality Trainer concludes each module with a real-world exercise to ensure that the knowledge you have gained can be directly applied to your own work. These hands-on activities resemble challenges you face every day, allowing you to transfer your new skills to your job immediately.

Manage your entire company's learning online.

Make sure all your employees are ready to implement their projects by using a simple web dashboard to track subscriptions, review quiz scores and progress reports, and issue completion certificates.

Additional Training Opportunities

The same industry-seasoned trainers who developed Quality Trainer offer a wide range of public, onsite, and remote courses. You can attend a live training session and use Quality Trainer to deepen and reinforce your knowledge over time.

The Quality Trainer Advantage

Thousands of organizations around the world have used Minitab software for more than 40 years. When you purchase Quality Trainer to learn statistics, you get a host of additional benefits from a company that is as committed to your success as you are.

Enterprise-Wide Learning

Quality Trainer makes it easy to train large numbers of employees, wherever they are. You can use a central web site to manage their subscriptions, track their progress, review quiz scores, and even issue completion certificates.

Enhanced Productivity

Employees who can learn and refresh their knowledge of statistics anytime they are online are more confident and can complete their projects faster and with greater independence.

Data Analysis Expertise

Every member of our customer service team has a deep understanding of the statistical analysis challenges you face, from the statisticians who developed Quality Trainer to the sales and support representatives who help you access it.

Technical Support

We're there for you whenever you need us. Access unlimited phone or online support delivered by highly-skilled specialists who understand quality improvement.

Significant discounts are available when you purchase Quality Trainer for users covered by your annual Minitab Statistical Software license.

Enterprise licensing options are also available. Contact us for more information.

Volume discounts apply when you purchase ten or more yearly subscriptions. Each subscription begins the first time a user launches Quality Trainer and expires after the length of time designated during purchase.

Academic Pricing

Special pricing is available for qualified academic institutions who wish to add Quality Trainer to their existing Minitab Statistical Software license. Single-user licenses are not eligible for special pricing.
